

Minutes Online Conference

Thursday March 6, 2014 13:00-14:00 CET time

Adobe Connect <http://frea.adobeconnect.com/p2raxe7n2bd/>

Participants: Christel Liljegren (ESS), Laurent Coggerino (Rhone), Elisa (Liguria), Maja (REAN), P-A (KRONO), Pernille (ECnet), Simon Clement (ICLEI), Johanna ESS, Jørgen Grubbe (HOL) ref.

1. Welcome (Jørgen)

2. Short presentation of “Assessment table of GPP projects supported by the Task Forces” (ECNet + HOL)

Pernille presented the table. There were no comments on this.

3. Discussion of calculation methodology (HOL)

Pernille raised the question concerning the modified calculation methods which was modified during the negotiation phase. Simon referred to the calculation methods developed by the GPP2020 project. The experience is that all calculations methods are depending on a range of assumptions. ICT and vehicles is already tested and lightening is close to be ready. The focus on the first tools are primary focusing on the CO₂ emission, however, the future tools will focus on LCC costs. Simon proposed that the calculation tools are developed whenever the need for specific tools occurs.

Jørgen mentioned the difficulties when making assumptions regarding the base line emission. Simon replied that calculation is based either on the conventional worst case, the solutions of the last tender or the low carbon solution compared with the actual implemented solution.

ICLEI will support all partners with the calculations whenever needed.

Preliminary inspiration from GPP 2020 (ICLEI) was distributed through this link:

<http://www.gpp2020.eu/low-carbon-tenders/measuring-savings/>

4. PRIMES logo - Presentation of draft (HOL)

The LOGO design line was presented. The six leafs in the logo represents the six participating countries. All partners agreed in the choice of logo.

5. Other issues

Pernille (ECnet) thanked for having received a high number mobilization reports

Johanna reminded the partners to come with feed-back concerning the national dissemination plan
